

Thank you for trying out the **Holographic Universe** soundset for Serum!

This free version contains only 25 out of the 88 presets. Click [Here](#) for the full version.

Installation

To use the soundset, simply extract the contents of the .zip archive to a folder of your choice. There you will find four folders, a text file, and some artwork:

- **TTU - Holographic Universe Soundset Free** (All presets in one folder)
- **TTU - Holographic Free** (Contains Noise Samples which need to be moved)
- Holographic Universe Soundset.pdf
- Holographic Universe Soundset.jpeg

First, copy the “TTU - **Holographic Universe Soundset Free**” folder into the default sound banks folder for Serum.

The default **Presets** folders

On Windows : User/Documents/Xfer/Serum Presets/Presets

On Mac OS X: Music/Xfer/Serum Presets/Presets

Then, copy the “TTU - **Holographic Free**” folder into the Serum’s noise folder.

The default **Noises** folders

On Windows : User/Documents/Xfer/Serum Presets/Noises

On Mac OS X: Music/Xfer/Serum Presets/Noises

That’s it, you should be good to go!

If you bought the midi expansion pack, you are free to place the MIDI files where you like on your hard drive :)

After the presets and wavetables have been copied into the "Xfer's" directory, the presets will show up within Serum's preset browser within their own respective folders.

CPU Optimizations

I tried my best to program the patches to not use any more processing power than absolutely necessary, however, in case you run into any patches that strain your system more than you would like, the first thing I would recommend is to reduce the number of voices in the global unison section, then try the same at the oscillator level, across as many layers as necessary. In addition, try reducing the quality settings to 1x oversampling in draft mode.

Unlimited Downloads

I will be happy to resend the download links to the soundset at any time. Just send me an email at tj.ivory@touch-the-universe.com and I'll be happy to send you another link.

Licence agreement and terms of usage

This license agreement is between you (the licensee) and me (Timothy Ivory).

1.) The licensee must not distribute the patches from the Holographic Universe Soundset for Serum, resample them, copy or otherwise replicate the patches in any commercial, free or otherwise product. That includes sample and audio libraries and patches for samplers and sample based synthesizers. You can of course create such derivatives for your own musical work as long as these derivatives are only distributed in the context of your musical- or sound design-work.

2.) The license to the soundset Holographic Universe Soundset for Serum may not be given away or sold (NFR).
